22 May 1967

	NOTE FOR: Carl		
	SUBJECT : ORD Isodensitracer		
	1. I raised the question of the delivery of this equipment to ORD rather than NPIC and you asked that I check on this.		
	2. I discussed this today with Steve had been trying to establish a beachhead at NPIC and was aware of the history on this subject.		25X1/
25X1A	3. NPIC did have a production requirement for this gear, but the money for the equipment was knocked out of the NPIC budget in favor of higher priority items. of ORD has		
25X1A	told NPIC people about the delivery of the equipment and the intention to have it installed in IPRD. feels the NPIC people are delighted, and are planning to work with ORD using this gear in IPRD apparently to further define just what their needs may be. I recall one of the NPIC needs for the densitometer was to develop quantitative photo quality criteria and to make more precise measurements on structures, etc., but	sie de de la companya	
	Steve and I do not know the extent to which NPIC needed the equipment for production rather than investigative work.		. Shirth
25X1A 25X1A	4. Steve will see tomorrow. I suggested that he ask directly whether anyone in NPIC feels they have been mistreated. Steve does not believe this to be the case, but	:	
	will ask directly to make sure.
